EDUCATION

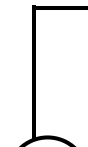

SOFTWARE ENGINEER

08/2022 - present

Duy Tan University

- GPA: 3.69

WORK EXPERIENCES

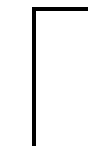

D-SOFT JOINT STOCK COMPANY

03/2026 - 05/2026

Intern (Full Stack Developer)

- Developed and maintained web application features using Vue.js and Laravel.
- Built responsive UI components and integrated RESTful APIs.
- Worked with MySQL, authentication, and CRUD-based modules.
- Collaborated with team members using Git and Agile workflow.

PROJECTS

DIGITAL CAREGIVER

11/2025 - 12/2025

Project Description

- An AI-powered Digital Caregiver platform for elderly care, featuring voice interaction, smart medication management, AI-based prescription extraction, real-time monitoring, and emergency alerts.
- **Live Demo:** digital-caregiver-smoky.vercel.app.

Team size - 4

Role - Full-stack Developer

Key Responsibilities & Contributions

- **Authentication & Security:** Implemented Firebase, Google OAuth 2.0, JWT refresh tokens, and cookie-based sessions.
- **Caregiver Integration:** Developed secure caregiver pairing using unique connection codes with expiration logic.
- **Medication Management:** Built prescription and medication management with automated next-dose notifications.
- **AI Integration:** Integrated Gemini AI for prescription assistance and user guidance.
- **Database & Backend:** Designed scalable MongoDB schemas and optimized API/service performance.
- **DevOps & PWA:** Configured Vercel deployment and added PWA offline support.

LANGUAGES

ENGLISH

- Proficiency Level: Good
- Skills: Listening, Speaking, Reading, Writing
- Applications: Note-taking, book translation, interpretation

SMART TRAVEL AI

03/2026 - 05/2026

Project Description

- A smart travel platform for AI trip planning, tour booking, provider management, guide assignment, online payment, and live tour tracking
- **Live demo:** traveon.id.vn

Team size - 5

Role - Full-stack Developer

Key Responsibilities & Contributions

- **Authentication & Authorization:** Implemented secure login, email verification, password reset, and role-based access control.
- **AI Trip Planner:** Built an itinerary planner that generates travel plans based on destination, budget, duration, and traveler count.
- **AI Chatbot Assistant:** Developed an AI chatbot for tour guidance, booking support, and travel recommendations.
- **AI Tour Workflow:** Developed AI-generated tour request flows between travelers and providers.
- **Tour & Guide Management:** Implemented tour/service management, guide assignment, and schedule validation.
- **Booking & Payment:** Integrated PayOS payment flow with payment status sync and booking history.
- **Live Tour Tracking:** Built real-time tracking links and live tracking views for travelers and guides.

AI RESUME SCREENER

01/2026 - 03/2026

Project Description

- Built an AI-powered Resume Screener for HR with secure authentication, resume parsing, candidate ranking/filtering, and Cloudinary file storage using React, Node.js/Express, and MongoDB.
- **Live demo:** ai-resume-screener-seven.vercel.app

Role - Full-stack Developer

Key Responsibilities & Contributions

- **API Development:** Built scalable REST APIs for jobs, candidates, resumes, and screening workflows.
- **Authentication & Security:** Implemented JWT auth, Google OAuth, refresh-token sessions, and email/password login.
- **Account Recovery:** Developed email verification and password recovery using Nodemailer and token validation.
- **Resume Processing:** Built resume upload/parsing pipeline with Cloudinary integration and candidate profile extraction.
- **AI Screening Engine:** Integrated Gemini/OpenAI-based candidate scoring and ranking services.
- **Backend Reliability:** Added request validation, standardized APIs/errors, audit logging, and pagination/filtering.
